

# Linear regressions for niche analysis of Acaena clades

*Miki Nomura*

*27 February 2018*

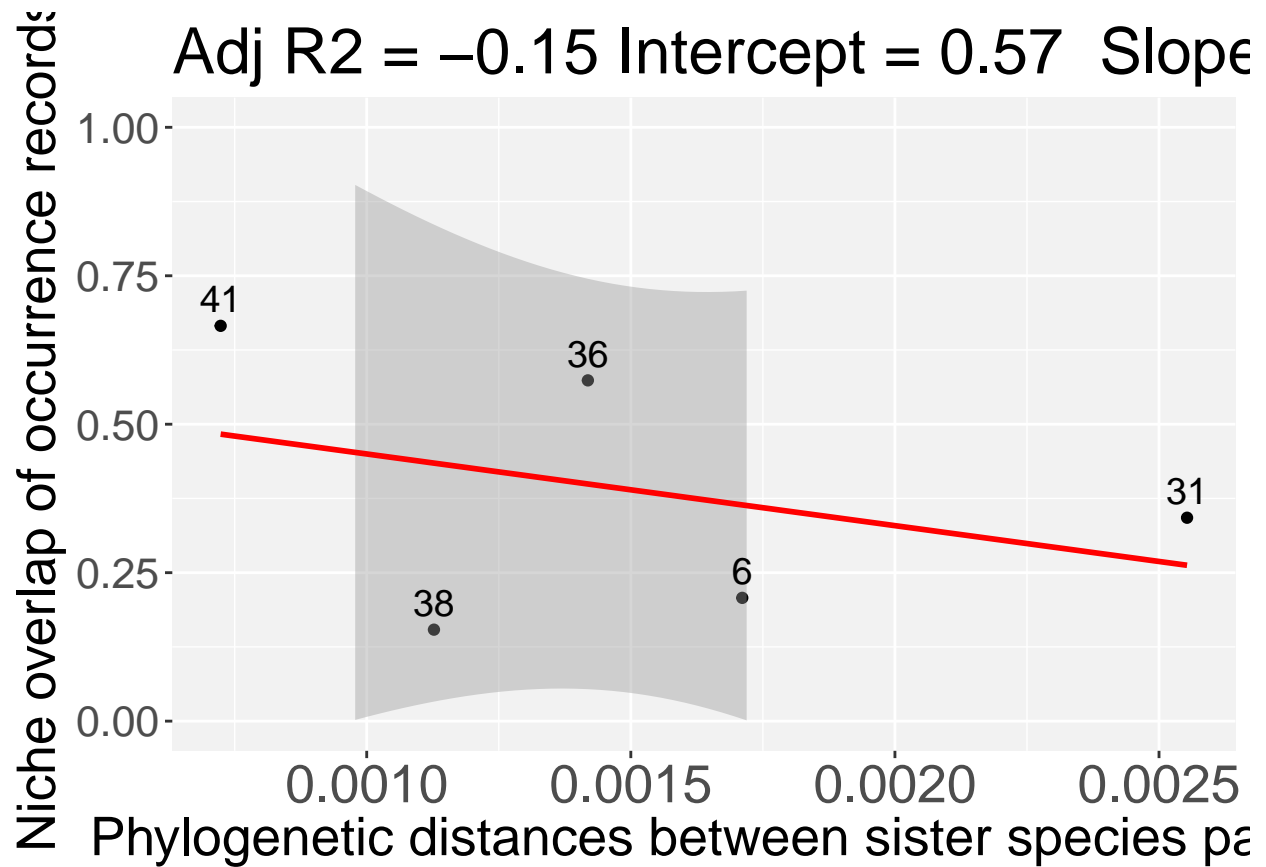

Sister species pairs' Phylogenetic distances ~ niche overlap of occurrence records

Niche overlap ranges 0 - 1, so I delimited y axis but it got rid of confidence interval from this figure.

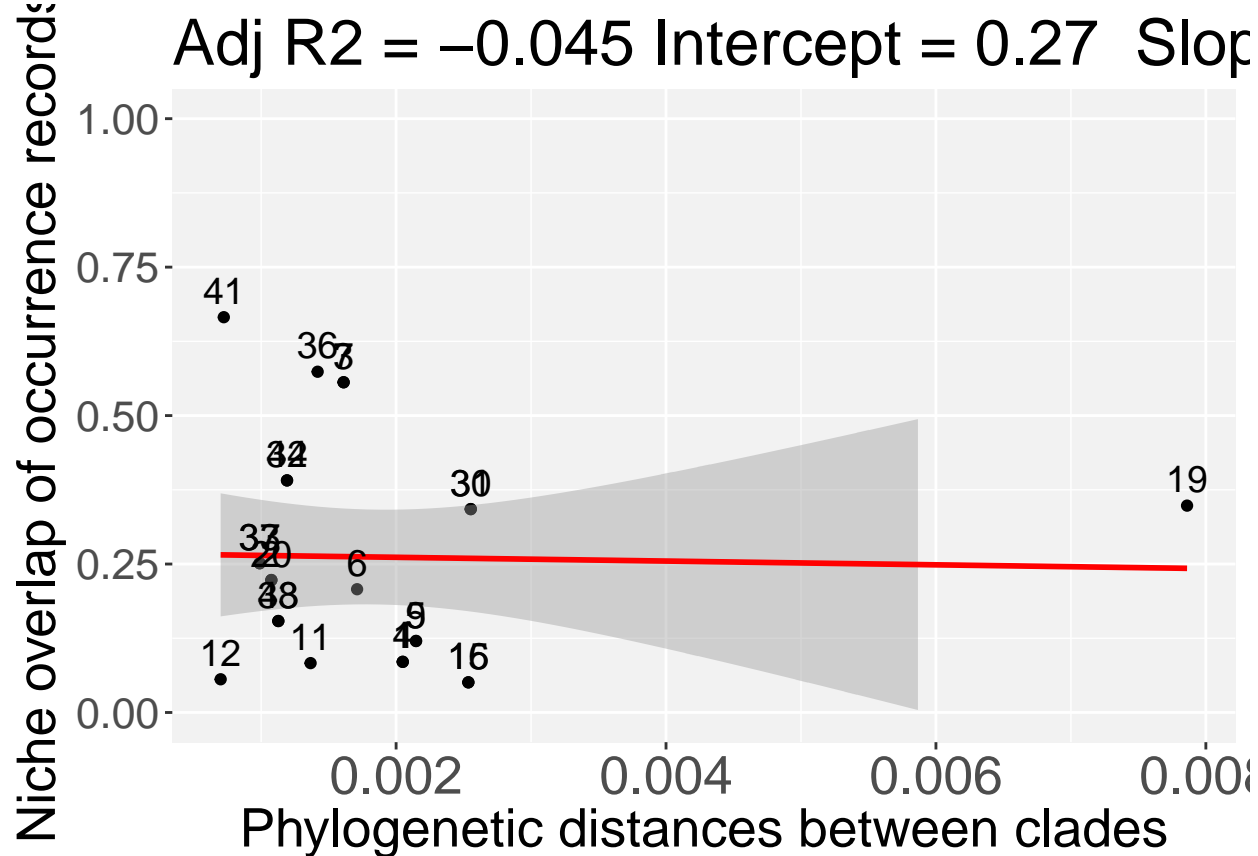

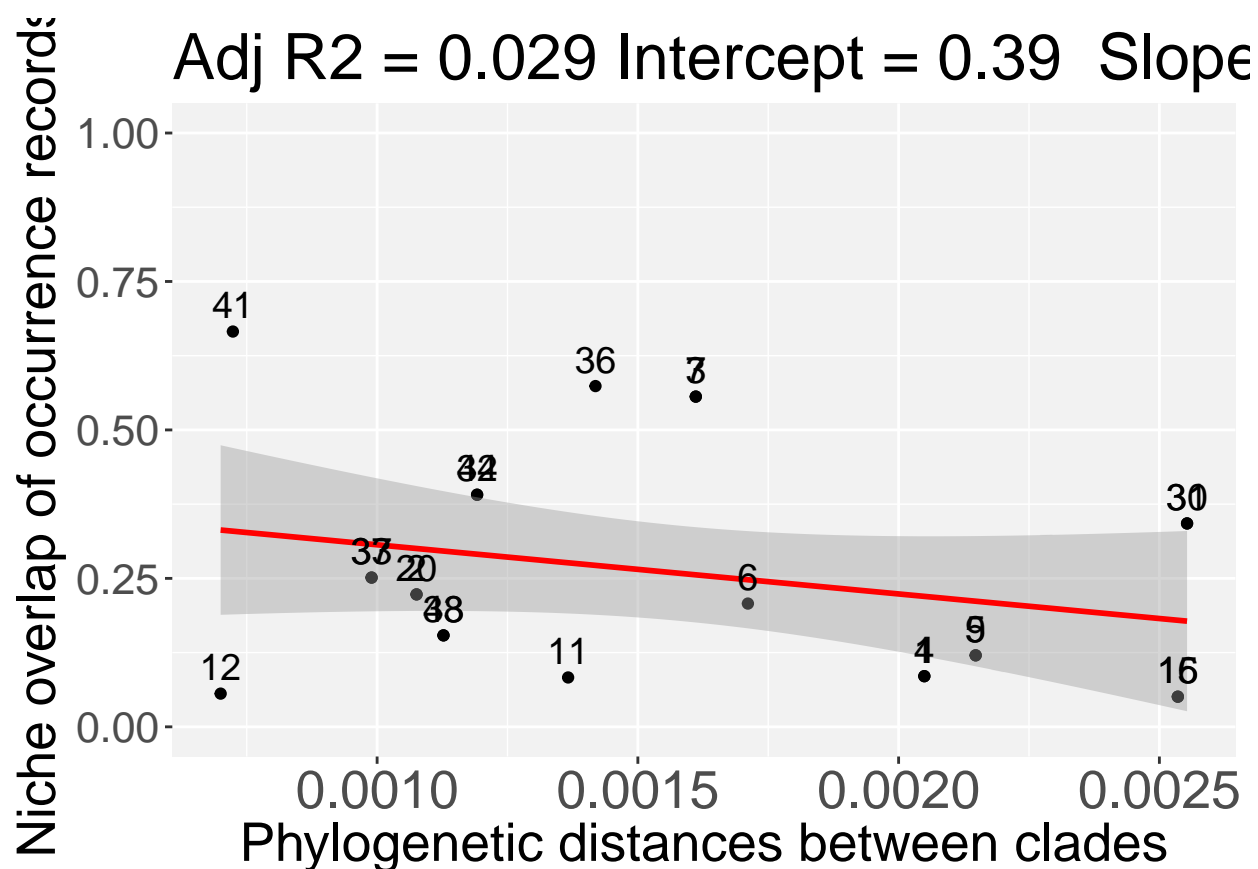

Sister species pair - their ancestor's sister node

Phylogenetic distances ~ niche overlap of occurrence records

Clade Phylogenetic distances ~ niche overlap of occurrence records

Clade ages ~ niche volume of occurrence records
